

OPEN FARM COMMUNITY

EVENTS

ROOT

At Open Farm Community, we want to connect people to the soil and seas in which their food grows. We do this by bringing together the farming community and creative chefs who create menus based on the best of what is available locally, with a selected few ethical imports and our very own farm and garden

MINDFUL

We respect our ingredients by continually experimenting with various ways to use them in the best way possible. With a compassionate spirit towards the environment, we pledge to serve only the freshest produce with niche-farming suppliers on your table.

SOURCE

Can you spot our farmers?

We have the team from Tiberias Farm harvesting the fishes from sea, Weeds & More cultivating the seasonal vegetables, Sustenir for our salad bowl and we work closely with Freedom Range team to encourage the use of cage-free eggs in our menus.

From our very own Garden and Farm just next to the restaurant, our chefs pick a variety of seasonal herbs and cress like Moringa, Laksa Leaf, Blue Pea Flower and the Roselle Flower that we incorporate in our menu.

FOOD

We invite you to join us on a culinary journey that celebrates an exciting dining experience.

Our farm-to-table offerings place the emphasis on freshness, organic produce and grass-fed animal proteins.

The aromatic herbs and blossoming flowers harvested from our very own farm and garden impart a touch of whimsy to each plate.
